- ☐ Difficulty supporting modern capabilities such as AI, automation, or real-time data usage
- ☐ Gaps between my current setup and future goals
- ☐ I am satisfied with my current MarTech stack

How to align multiple checkboxes and its text

Attached an image showing how the checkboxes should appear.

Solution:

```
p.privacy_state label{
    display: flex;
    align-items: start;
}

#checkbox1 label{
    display: flex;
    align-items: start;
    margin: 5px 0px;
}
```

```
[checkbox* checkbox-115 id:checkbox1 use_label_element "Value 1" "Value 2" "Value 3"]
```

```
<p class="privacy_state">[acceptance acceptance1 optional id:acceptanceCheckbox1]
Content[/acceptance]</p>
```

Note: Use the same class and Id for Checkbox and Acceptance Input
