

Edit Contact Form Actions on activateddemand.com

1 Open Dashboard and Click on "Contact Forms"

2 Click on "Edit" for edit your existing form

The screenshot shows the WordPress dashboard with the 'Contact Form 7' settings page. On the left sidebar, the 'Settings' menu is expanded, and 'Contact Form 7' is selected. The main content area shows a list of forms. The form 'Redirect contact form7' is highlighted, and the 'Edit' button is circled in orange. A message indicates '1 configuration error detected'. The 'Duplicate' button is also visible. The 'Bulk actions' dropdown and 'Apply' button are at the top of the list. The 'Title' and 'Shortcode' columns are visible. The footer says 'Thank you for creating with WordPress.'

3 Click on "Actions"

The screenshot shows the WordPress dashboard with the 'Contact Form 7' settings page. The 'Form' tab is selected, and the 'Actions' button is circled in orange. The 'Form' tab shows the form template editor. The 'Mail' tab is also visible. The 'Additional Settings' and 'Actions' tabs are at the top. The 'Form' tab shows the form template editor with fields for 'Name', 'Email', 'Phone', and 'Submit'. The 'Mail' tab shows the email content editor. The 'Additional Settings' tab shows the form settings. The 'Actions' button is circled in orange. The 'Bulk actions' dropdown and 'Apply' button are at the top of the list. The 'Title' and 'Shortcode' columns are visible. The footer says 'Thank you for creating with WordPress.'

4 Click on "Choose Action" and select "Redirect" from the dropdown.

Rule Title

New Action

☒ Use custom URL

Select a page

Select a page

☐ Redirect as X-WWW-FORM-URLENCODED (Form Post)

☐ Open page in a new tab

☐ Pass all the fields from the form as URL query parameters

☐ Pass specific fields from the form as URL query parameters

☐ Encode passed query parameters

8 Enter your target URL inside the "Use external URL" field.

The screenshot shows the 'New Action' configuration page for a redirect rule. On the left is a dark sidebar with a menu containing 'Contact Forms', 'Add New', 'Integration', 'Redirection settings', 'Contact Us', 'Support Forum', 'Add-Ons', 'Upgrade' (highlighted in green), 'Leads', 'Appearance', 'Plugins' (with a red badge '4'), 'Users', 'Tools', 'Settings', and 'Wordfence' (with a yellow badge '2'). The main content area has a header with 'New Action' and 'Redirect'. Below this, the 'Rule Title' field contains 'New Action'. The 'Use custom URL' toggle is turned on. The 'Use external URL' field is highlighted with an orange circle and contains the text 'Use external URL'. Below this are several toggle options: 'Redirect as X-WWW-FORM-URLENCODED (Form Post)', 'Open page in a new tab', 'Pass all the fields from the form as URL query parameters', 'Pass specific fields from the form as URL query parameters', and 'Encode passed query parameters'. At the bottom, there is a 'How many seconds to delay' field.

9 Click on "Redirect as X-WWW-Form-Urlencoded".

The screenshot shows the 'New Action' configuration page for a redirect rule. The 'Use external URL' field now contains the URL 'https://wisdominterface.com/'. The 'Redirect as X-WWW-FORM-URLENCODED (Form Post)' toggle is highlighted with an orange circle and is turned on. The other settings remain the same as in the previous step.

10 Click "Save".

Redirect contact form7

Copy this shortcode and paste it into your post, page, or text widget content:

```
[contact-form-7 id="5c64fbb" title="Redirect contact form7"]
```
