3 Click on "Select and Multi-Select"

Form-tag Generator: Select and Multi-Select

Generate a Select and Multi-Select Field based on Select2

Field type ☐ Required field

Name

Options
☐ One option per line.

☐ Allow multiple selections

Placeholder (Optional), Separated by hypens

Size

4 Enter the field name "ans2"

The screenshot shows the 'Form-tag Generator: Select and Multi-Select' dialog box. The 'Name' field is highlighted with an orange circle and contains the text 'selct_multiselect-961'. The 'Options' field contains a list of options: 'a', 'b', 'c', and 'd'. The 'Allow multiple selections' checkbox is checked. The 'Placeholder' field is empty. The 'Size' field is set to '400px (Size in px or %)'.

5 Add your multi-select field "One option per line."

The screenshot shows the 'Form-tag Generator: Select and Multi-Select' dialog box. The 'Name' field contains the text 'selct_multiselect-961'. The 'Options' field is empty, with an orange circle highlighting the input area. The 'Allow multiple selections' checkbox is unchecked. The 'Placeholder' field is empty. The 'Size' field is set to '400px (Size in px or %)'.

6 Click on "Allow multiple selections"

The screenshot shows the 'Form-tag Generator: Select and Multi-Select' interface. On the left is a sidebar with navigation links like 'Flamingo', 'Contact', 'Add New', 'Integration', 'Conditional Fields', 'Dynamic Text Extension', 'Honeypot', 'More mails', 'CookieYes', 'Appearance', 'Plugins', 'Users', and 'Tools'. The main panel is titled 'Form-tag Generator: Select and Multi-Select' and contains a sub-header 'Generate a Select and Multi-Select Field based on Select2'. The configuration fields are as follows:

- Field type:** ☐ Required field
- Name:**
- Options:** A list box containing 'a', 'b', 'c', and 'd'. To the right of the list is a note: 'One option per line.' Below the list is a checked checkbox labeled 'Allow multiple selections'.
- Placeholder (Optional), Separated by hypens:**
- Size:**
- Id attribute:**

At the bottom, there is a text area containing the generated code: `[selct_multiselct selct_multiselct-961 multiple "a" "b" "c" "d"]`. To the right of this area is a blue button labeled 'Insert Tag'.

7 Add the class "form-control"

This screenshot shows the same 'Form-tag Generator' interface as before, but with the 'Class attribute' field highlighted by an orange circle. The 'Class attribute' field is currently empty. The other fields remain the same: 'Field type' is unchecked, 'Name' is 'selct_multiselct-961', 'Options' are 'a', 'b', 'c', 'd' with 'Allow multiple selections' checked, 'Placeholder' is empty, 'Size' is '400px (Size in px or %)', and 'Id attribute' is empty. The generated code in the text area is still `[selct_multiselct selct_multiselct-961 multiple "a" "b" "c" "d"]`. The 'Insert Tag' button is still present. Below the text area, there is a note: 'To use the value input through this field in a mail field, you need to insert the corresponding mail-tag ([selct_multiselct-961]) into the field on the Mail tab.'

8 Enter the ID "limitation"

Dynamic text extension

Placeholder (Optional), Separated by hypens

Size 400px (Size in px or %)

Id attribute

Class attribute form-control

[selct_multiselct selct_multiselct-961 class:form-control multip

Insert Tag

To use the value input through this field in a mail field, you need to insert the corresponding mail-tag ([selct_multiselct-961]) into the field on the Mail tab.

9 Click on "Insert Tag"

Dynamic text extension

Placeholder (Optional), Separated by hypens

Size 400px (Size in px or %)

Id attribute limitation

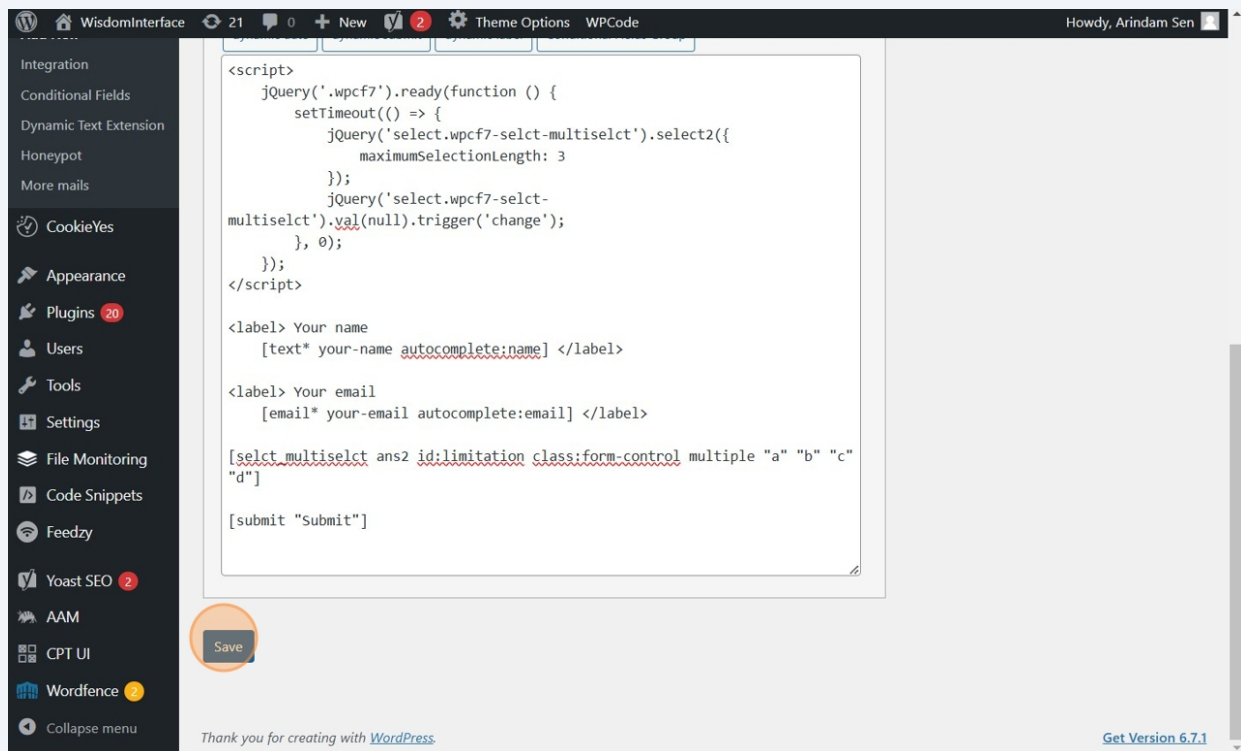

Class attribute form-control

selct_multiselct ans2 id:limitation class:form-control multiple

Insert Tag

use the value input through this field in a mail field, you need to insert the corresponding mail-tag (ns2]) into the field on the Mail tab.

10 Add the Script top of the form and click on "Save"

The screenshot shows the WPCode plugin interface in a WordPress dashboard. The left sidebar contains a menu with options like Integration, Conditional Fields, Dynamic Text Extension, Honeypot, More mails, CookieYes, Appearance, Plugins (20), Users, Tools, Settings, File Monitoring, Code Snippets, Feedzy, Yoast SEO (2), AAM, CPT UI, Wordfence (2), and Collapse menu. The main area displays a code editor with the following JavaScript code:

```
<script>
  jQuery('.wpcf7').ready(function () {
    setTimeout(() => {
      jQuery('select.wpcf7-select-multiselect').select2({
        maximumSelectionLength: 3
      });
      jQuery('select.wpcf7-select-multiselect').val(null).trigger('change');
    }, 0);
  });
</script>

<label> Your name
  [text* your-name autocomplete:name] </label>

<label> Your email
  [email* your-email autocomplete:email] </label>

[select multiselect ans2 id:limitation class:form-control multiple "a" "b" "c" "d"]

[submit "Submit"]
```

Below the code editor, there is a "Save" button. At the bottom of the interface, there is a footer that says "Thank you for creating with [WordPress](#)" and a link to "Get Version 6.7.1".
