CRM and email marketing services, you can build your own contact lists ([View](#)).

With help from cloud-based machine learning, anti-spam services will protect your forms ([reCAPTCHA](#)).
Even payment services are natively supported ([Stripe](#)).

Bulk actions ▾Apply

<input type="checkbox"/>	Title ▾	Shortcode
<input type="checkbox"/>	New Intentsify Campaigns - Insight (Two-Touch/CQ)-Millions	[contact-form-7 id="cat
	Edit Duplicate	
<input type="checkbox"/>	Title ▾	Shortcode

Bulk actions ▾Apply

2 Click on "Actions" tab in contact form 7

Ok, you deserve it 📅 Nope, maybe later 😊 I already did

Misconfiguration leads to mail delivery failure or other troubles. Validate your contact forms now. > [Validate Contact Form 7 Configuration](#)

New Intentsify Campaigns - Insight (Two-Touch/CQ)-Millions

Copy this shortcode and paste it into your post, page, or text widget content:

```
[contact-form-7 id="caf03c2" title="New Intentsify Campaigns - Insight (Two-Touch/CQ)-Millions"]
```

Submission. For details and support check [out our add-ons](#).

Type	Active
Redirect	Enabled

4 Now click on "Add Action" button

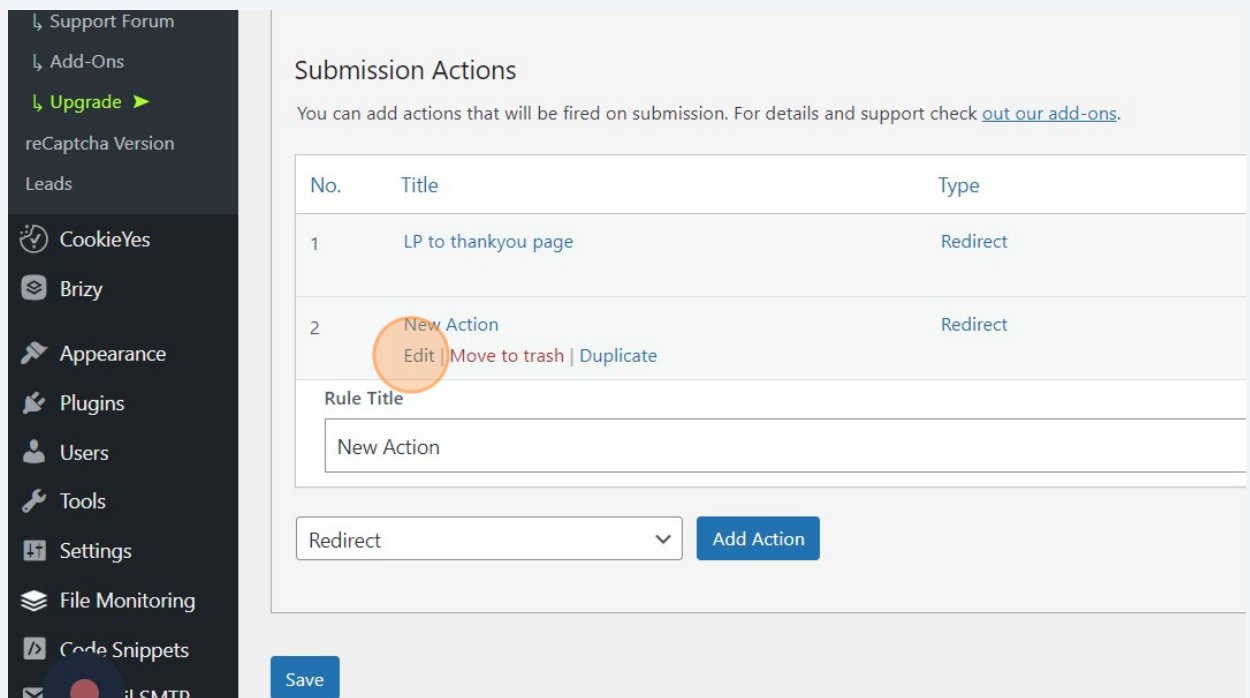

The screenshot shows the 'Submission Actions' interface. On the left is a dark sidebar with menu items: 'Support Forum', 'Add-Ons', 'Upgrade' (highlighted with a green arrow), 'reCaptcha Version', 'Leads', 'CookieYes', 'Brizy', 'Appearance', 'Plugins', 'Users', 'Tools', 'Settings', 'File Monitoring', 'Code Snippets', and 'il SMTP'. The main content area has the title 'Submission Actions' and a subtitle 'You can add actions that will be fired on submission. For details and support check [out our add-ons.](#)'. Below this is a table with columns 'No.', 'Title', 'Type', and 'Active'. It contains one row: '1', 'LP to thankyou page', 'Redirect', and 'Enabled'. Under the table is a dropdown menu showing 'Redirect' and an 'Add Action' button, which is circled in orange. At the bottom left of the main area is a 'Save' button.

No.	Title	Type	Active
1	LP to thankyou page	Redirect	Enabled

Redirect Add Action

Save

5 Now Click "Edit"

This screenshot shows the 'Submission Actions' page after adding a second action. The sidebar is identical to the previous screenshot. The table now has two rows: '1', 'LP to thankyou page', 'Redirect', and 'Enabled'; and '2', 'New Action', 'Redirect'. Below the second row, the text 'New Action' is circled in orange, and below it, the text 'Edit | Move to trash | Duplicate' is visible. Below the table is a 'Rule Title' input field containing 'New Action'. At the bottom of the main area is a 'Save' button. The 'Add Action' button is still present at the bottom of the table area.

No.	Title	Type
1	LP to thankyou page	Redirect
2	New Action	Redirect

☒ Use custom URL

Select a page

Select a page

☐ Redirect as X-WWW-FORM-URLENCODED (Form Post)

☐ Open page in a new tab

☐ Pass all the fields from the form as URL query parameters

☐ Pass specific fields from the form as URL query parameters

☐ Encode passed query parameters

8

Click the "Use external URL" field and add the second page link here

The screenshot shows the WPCode interface with a sidebar on the left containing various categories like Leads, CookieYes, Brizy, Appearance, Plugins, Users, Tools, Settings, File Monitoring, Code Snippets, WP Mail SMTP, AAM, and Custom Permalinks. The main area displays a rule configuration for a 'thankyou page' with a 'Redirect' action. The 'Rule Title' is 'thankyou page'. The 'Use custom URL' toggle is turned on. The 'Use external URL' field is highlighted with an orange circle and contains the text 'Use external URL'. Below this, there are several toggle options: 'Redirect as X-WWW-FORM-URLENCODED (Form Post)', 'Open page in a new tab', 'Pass all the fields from the form as URL query parameters', 'Pass specific fields from the form as URL query parameters', and 'Encode passed query parameters'. The 'How many seconds to delay' field is set to 'Number of seconds'.

9

Now Enable the(redirect as X-WWW-FORM-URLENCODED(from Post))

The screenshot shows the WPCode interface with the same sidebar as the previous image. The main area displays the same rule configuration for a 'thankyou page' with a 'Redirect' action. The 'Rule Title' is 'thankyou page'. The 'Use custom URL' toggle is turned on. The 'Use external URL' field is highlighted with an orange circle and contains the text 'https://resources.wisdominterface.com/2024/05/02/q2-millions-in-revenue-ai-recommendation-engine'. Below this, the 'Redirect as X-WWW-FORM-URLENCODED (Form Post)' toggle is highlighted with an orange circle and is turned on. The 'Open page in a new tab' toggle is turned off. The 'Pass all the fields from the form as URL query parameters', 'Pass specific fields from the form as URL query parameters', and 'Encode passed query parameters' toggles are all turned off. The 'How many seconds to delay' field is set to 'Number of seconds'. At the bottom, the 'Enabled' toggle is turned on.
