

Redirecting URL using Redirection plugin in Scribe WordPress

1 Navigate to <https://resources.wisdominterface.com/wp-admin/>

2 Click "Redirection"

3 Click "Add New"

The screenshot shows the WordPress dashboard with the 'Tools' menu item highlighted in the left sidebar. The main content area displays a notification about 'Conditional Fields for Contact Form 7' and a message from Brizy. Below these, the 'Add New' button for the 'Redirects' tool is circled in orange. The 'Redirects' section includes a table with columns for 'Bulk Actions', 'Apply', 'All groups', 'Apply', and 'Filters'. The table contains one row with a checkbox and the URL '/wp-content/uploads/2024/05/Power-education-technology-with-Verizon-E-Rate-eligibility-changes-and-benefits-https://resources.wisdominterface.com/wp-content/uploads/2024/05/Power-education-technology-with-Verizon-E-Rate-eligibility-changes-and-benefits-Q2.html'.

4 Enter the "The relative URL you want to redirect from" field.

The screenshot shows the WordPress dashboard with the 'Tools' menu item highlighted in the left sidebar. The main content area displays a notification about 'Conditional Fields for Contact Form 7' and a message from Brizy. Below these, the 'Add New' button for the 'Redirects' tool is circled in orange. The 'Redirects' section includes a form with fields for 'Source URL', 'Query Parameters', 'Target URL', and 'Group'. The 'Source URL' field is circled in orange and contains the text 'The relative URL you want to redirect from'. The 'Query Parameters' field is a dropdown menu with 'Exact match in any order' selected. The 'Target URL' field contains the text 'The target URL you want to redirect, or auto-complete on post name or permalink'. The 'Group' field is a dropdown menu with 'Redirections' selected. Below the form, there are buttons for 'Add Redirect', 'Close', and a gear icon. The table below the form shows one row with a checkbox and the URL '/wp-content/uploads/2024/05/Power-education-technology-with-Verizon-E-Rate-eligibility-changes-and-benefits-Q2.html'.

5

Enter the "The target URL you want to redirect, or auto-complete on post name or permalink." field.

How to Set Up URL Redirection on Your Website

1 Click on "Redirection"

2 Click on Add New.

The screenshot shows the WordPress dashboard with the 'Tools' menu item selected. The 'Redirections' plugin interface is displayed, featuring a sidebar with navigation links and a main content area. The 'Add New' button is highlighted with an orange circle. The main content area shows a list of existing redirections with columns for URL, Code, Hits, and Last Access. The first redirection is for the source URL '/a-cisos-primer-for-strategic-cybersecurity-risk-reduction-with-attack-surface-manag' with a 301 status code, 9 hits, and a last access date of November 14, 2024.

3 Enter your Source URL.

The screenshot shows the WordPress Redirections plugin interface with the 'Add New' button highlighted. The 'Source URL' field is highlighted with an orange circle. The 'Target URL' field is also visible. The 'When matched' section shows 'Redirect to URL' with a '301 - Moved Permanently' status code. The 'Group' dropdown is set to 'Redirections' and the 'Position' is 183. The 'Save' button is highlighted with an orange circle. The main content area shows a list of existing redirections with columns for URL, Code, Hits, and Last Access.

4 Click on Match and Select URL Only.

The screenshot shows the WPeMatico Redirections management interface. On the left is a dark sidebar with navigation links: POSTS, WPeMatico, Media, Popup Builder, Pages, Comments, Blogs, News-posts, Theme Options, Flamingo, Contact (1), CookieYes, Appearance, Plugins (17), Users, Tools (highlighted), Available Tools, Import, Export, Site Health (1), and Export Personal Data. The main content area is titled 'REDIRECTIONS' and includes a status bar at the top: 'CF7 DTX: Shortcode data access requires allow-listing. Edit Settings | Scan & Resolve | More Information'. Below this is an 'Add New' button. The interface is divided into sections: 'Redirections' (selected), 'Groups', 'Site', 'Log', 'Import/Export', 'Options', and 'Support'. The 'Redirections' section has a 'Bulk Actions' dropdown and an 'Apply' button. A dropdown menu is open over the 'Match' field, listing various matching criteria: 'URL only' (highlighted in blue), 'URL and login status', 'URL and role/capability', 'URL and referrer', 'URL and user agent', 'URL and cookie', 'URL and IP', 'URL and server', 'URL and HTTP header', 'URL and custom filter' (circled in orange), 'URL and WordPress page type', 'URL and language', and 'URL and language'. The 'Match' field itself is set to 'URL only'. Below the dropdown, the 'When matched' section shows 'HTTP code' set to '301 - Moved Permanently' and an 'Exclude from logs' checkbox. The 'Target URL' field contains a long URL. The 'Group' dropdown is set to 'Redirections' and the 'Position' is '183'. At the bottom of the form are 'Save', 'Cancel', and a settings gear icon. Below the form is a table of redirections with columns for checkboxes, source URLs, status codes, hit counts, and last access dates.

	Source URL	Code	Hits	Last Access
<input type="checkbox"/>	/across-the-entire-attack-surface-risk-requires-a-platform/ https://www.wisdominterface.com/across-the-entire-attack-surface-risk-requires-a-platform-q4/	301	9	November 14, 2024

After completed above steps, to check your Redirection Status Click on Check Redirect.

The screenshot shows the WordPress Redirections plugin interface. The left sidebar contains the following menu items: Pages, Comments, Blogs, News-posts, Theme Options, Flamingo, Contact (1), CookieYes, Appearance, Plugins (17), Users, and Tools (highlighted). Below the sidebar, the 'Available Tools' section is visible. The main content area is titled 'Redirects' and includes navigation links: Groups, Site, Log, 404s, Import/Export, Options, and Support. A 'Standard Display' dropdown menu is located in the top right corner. Below the navigation links, there are buttons for 'Bulk Actions', 'Apply', 'All groups', 'Apply', and 'Filters'. A table with 198 items is displayed, showing a list of redirects. The table has two columns: 'URL' and 'Code'. The first redirect is highlighted, and the 'Check Redirect' button is circled in orange.
