Do you need help?

Here are some available options to solve your problems.

1. [FAQ and docs](#)
2. [Support forums](#)
3. [Professional services](#)

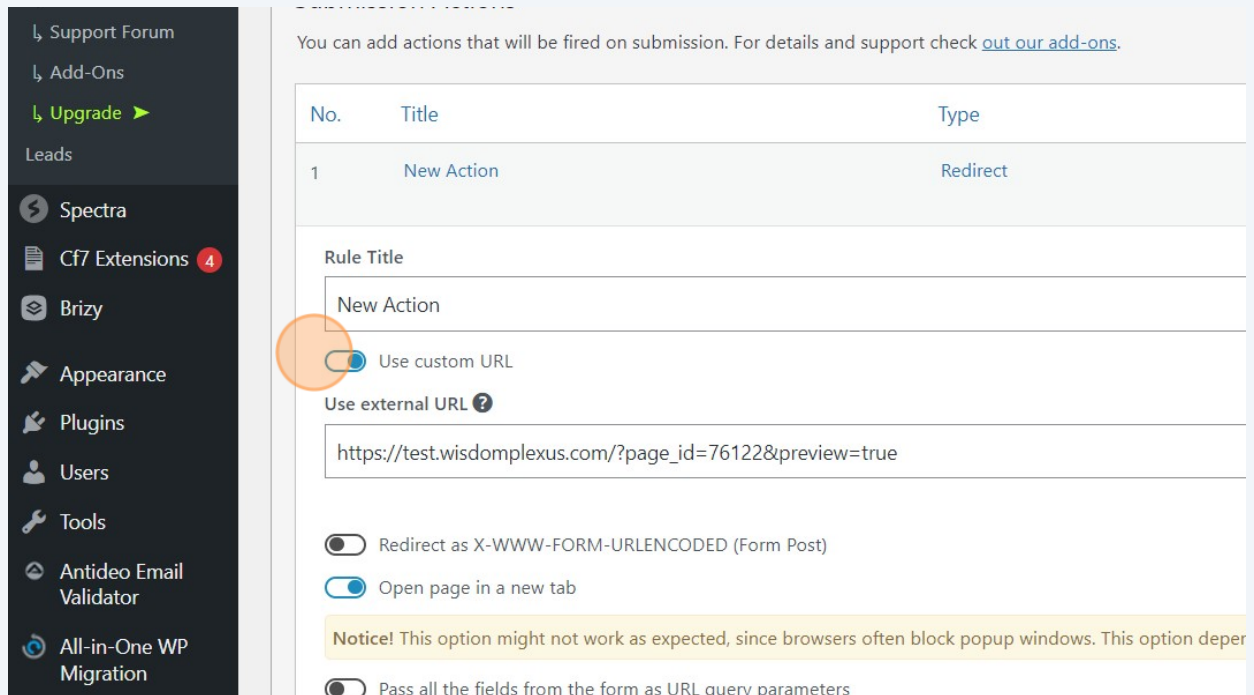

2 Add redirect action.

The screenshot shows the 'Submission Actions' configuration page. At the top, there are tabs for 'Form', 'Mail', 'Messages', 'Additional Settings', 'Actions', 'Conditional fields', and 'Conditional fields Settings'. The 'Actions' tab is selected. Below the tabs, there's a section for 'Submission Actions' with a description: 'You can add actions that will be fired on submission. For details and support check [out our add-ons.](#)'. Below this, there's a table with columns 'No.', 'Title', 'Type', and 'Active'. Below the table, there's a dropdown menu with 'Redirect' selected and an 'Add Action' button highlighted with an orange circle. At the bottom left, there's a 'Save' button.

3 Edit the newly added redirect action.

The screenshot shows the 'Submission Actions' configuration page. At the top, there are tabs for 'Form', 'Mail', 'Messages', 'Additional Settings', 'Actions', 'Conditional fields', and 'Conditional fields Settings'. The 'Actions' tab is selected. Below the tabs, there's a section for 'Submission Actions' with a description: 'You can add actions that will be fired on submission. For details and support check [out our add-ons.](#)'. Below this, there's a table with columns 'No.', 'Title', and 'Type'. The first row has '1' in the 'No.' column, 'New Action' in the 'Title' column, and 'Redirect' in the 'Type' column. Below the table, there's a dropdown menu with 'Redirect' selected and an 'Add Action' button. Below the dropdown, there's a 'Save' button. The 'Edit' button for the first action is highlighted with an orange circle.

4 Enable the "Use custom URL" and add external URL.

The screenshot shows the WP Rocket settings page. On the left is a dark sidebar with a menu containing: Support Forum, Add-Ons, Upgrade (highlighted in green), Leads, Spectra, Cf7 Extensions (with a red badge '4'), Brizy, Appearance, Plugins, Users, Tools, Antideo Email Validator, and All-in-One WP Migration. The main content area is titled 'You can add actions that will be fired on submission. For details and support check [out our add-ons](#).' Below this is a table with columns 'No.', 'Title', and 'Type'. The first row shows '1' in the 'No.' column, 'New Action' in the 'Title' column, and 'Redirect' in the 'Type' column. Below the table, the 'Rule Title' field contains 'New Action'. The 'Use custom URL' toggle is turned on and is circled in orange. The 'Use external URL' field contains the URL 'https://test.wisdomplexus.com/?page_id=76122&preview=true'. Below this, there are three more toggles: 'Redirect as X-WWW-FORM-URLENCODED (Form Post)' (off), 'Open page in a new tab' (on), and 'Pass all the fields from the form as URL query parameters' (off). A yellow notice box states: 'Notice! This option might not work as expected, since browsers often block popup windows. This option depends on the browser settings.'

No.	Title	Type
1	New Action	Redirect

Rule Title
New Action

☒ Use custom URL

Use external URL ?
https://test.wisdomplexus.com/?page_id=76122&preview=true

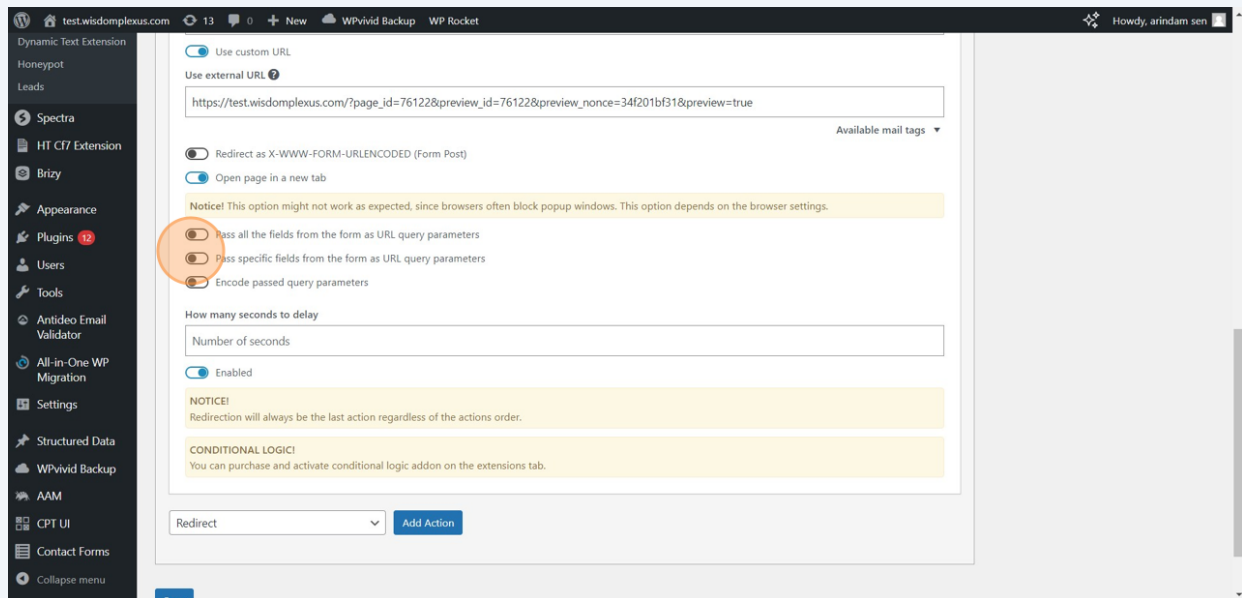

☐ Redirect as X-WWW-FORM-URLENCODED (Form Post)

☒ Open page in a new tab

Notice! This option might not work as expected, since browsers often block popup windows. This option depends on the browser settings.

☐ Pass all the fields from the form as URL query parameters

5 Enable the "Pass Specific Fields form as URL Query Parameters".

The screenshot shows the WP Rocket settings page. The sidebar is the same as in the previous screenshot. The main content area shows the 'New Action' configuration. The 'Use custom URL' toggle is turned on. The 'Use external URL' field contains the URL 'https://test.wisdomplexus.com/?page_id=76122&preview_id=76122&preview_nonce=34f201bf31&preview=true'. Below this, there are three more toggles: 'Redirect as X-WWW-FORM-URLENCODED (Form Post)' (off), 'Open page in a new tab' (on), and 'Pass all the fields from the form as URL query parameters' (off). The 'Pass specific fields from the form as URL query parameters' toggle is circled in orange. Below this, there is a section for 'How many seconds to delay' with a 'Number of seconds' field and an 'Enabled' toggle. A yellow notice box states: 'NOTICE! Redirection will always be the last action regardless of the actions order.' Below this, there is a section for 'CONDITIONAL LOGIC!' with a note: 'You can purchase and activate conditional logic addon on the extensions tab.' At the bottom, there is a dropdown menu set to 'Redirect' and an 'Add Action' button.

Use custom URL

Use external URL ?
https://test.wisdomplexus.com/?page_id=76122&preview_id=76122&preview_nonce=34f201bf31&preview=true

☐ Redirect as X-WWW-FORM-URLENCODED (Form Post)

☒ Open page in a new tab

Notice! This option might not work as expected, since browsers often block popup windows. This option depends on the browser settings.

☐ Pass all the fields from the form as URL query parameters

☒ Pass specific fields from the form as URL query parameters

☐ Encode passed query parameters

How many seconds to delay

Number of seconds

☒ Enabled

NOTICE!
Redirection will always be the last action regardless of the actions order.

CONDITIONAL LOGIC!
You can purchase and activate conditional logic addon on the extensions tab.

Redirect

6

Then copy the mail tag as per your requirement. And paste the mail tag inside the "Fields to pass as URL query parameters, separated by commas".
